

CIS 1202 - Midterm Project

As part of your midterm activities, you are to design and develop a program of your own creation. There is a list of suggestions below, but you can come up with your own idea.

Read all the instructions very carefully and review the grading rubric to make sure you're satisfying all of the requirements.

The grading rubric will be used to grade your final project.

Your midterm program must be original and not based on any assignments in this course.

Topic Ideas

1. Statistics (sports, video games, weather)
2. Business (accounting, warehousing, sales)
3. Home inventory system (your belongings, your movie collection, your music collection, your antiques collection)
4. Dictionary (Spanish-English, thesaurus, quotations, rhymes, Scrabble)
5. Personal finance (expense tracker, check book, budget)
6. Personal development (calorie tracker, exercise log, to-do list)

Grading Rubric

Requirement	Maximum Points
Correctly named and used variables, arrays, pointers, and structures. Used named constants if appropriate.	5
Use comments to document the code.	5
Enter data from the keyboard and validate the input.	10
Include at least three functions. Pass data to the functions using pointers or references.	20
Use structures or enumerations.	10
Use at least two functions from the C-string library.	10
Search an array.	10
Sort an array.	10
Format the output so it is aligned and easy to read.	5
The program executes without error and the output is correct.	10
Submit source code, screenshots of the output, and any other files needed.	5
Total points possible.	100

Functions must pass parameters and return values as needed, using only local variables. Global variables are not allowed.

Include comments at the beginning of your program with your name, the class (with section), and the date.
